

Magic to Uganda – seedlings and a water tank for Madi Opei

We, [Magic to the World e.V.](https://www.magictotheworld.de), are a non-profit association based in Lauffen am Neckar, Germany. In 2018, together with our friends in Uganda, we started counteracting desertification and the effects of climate change through reforestation in the north of the country. To continue our efforts in this year, we need further support from you!

Summary of the 2024 project goals:

- **20,000 seedlings** for the Madi Opei region, Uganda, in collaboration with communities, schools, farmers and the local organization ISCOT
- **Construction of a water tank** for the local tree nursery in order to be able to relocate the production facility, creating local jobs and saving costs
- Involvement of the local population through **workshops and education**
- Future source of food and protection of the soil from drought

We are looking for **financial support and sponsorship** for our project to be implemented from January to May 2024!

The growing and distribution of a seedling costs **only €0.50**

For an area the size of a football field (0.75ha) we need about 450€
